

Anepro grease *Calcium based Grease*

TECHNICAL DATA SHEET

Description:

Veedol Anepro greases are calcium based extreme pressure type greases. They are available in NLGI consistencies of 1 and 2.

Features/Benefits:

- Exceptionally high load carrying capacity, water resistance and are non-corrosive to iron, steel, copper and their alloys.

Application:

- Recommended for roll neck bearings in rolling mills where they have to resist washing action of water and also where lubricant has to function under severe shock load condition.
- Also suitable for mill roll bearings in sugar mills.

Typical Properties:

Test Parameters	Test Method	Typical Values	
		Anepro 11	Anepro 22
Texture	--	Smooth & Buttery	Smooth & Buttery
NLGI Consistency	--	1	2
Soap type	--	Calcium	Calcium
Worked Penetration, 60st @25 ⁰ C	ASTM D 217	322	278
Drop Point, ⁰ C	ASTM D 2265	100	100

Properties mentioned above are typical only and minor variations which do not affect the product performances, are to be expected in normal manufacturing.
